

Report Designer

Advanced features for creating Q-Pulse Reports

Purpose of the service:

- Enable users to create new Printed Reports from a blank canvas with a practical exercise utilising an agreed example of their choice.

Benefits for your organisation:

- Content and format tailored to specific needs.
- Improved communication and business intelligence.
- Reports reflect your organisation's colour schemes, logos and design format guidelines.

Benefits for you as an individual:

- Able to create new, professional Printed Reports using the Q-Pulse Report Designer tool.

You will learn how to:

- Use the powerful design features of Q-Pulse's Report Designer to build and format a report from scratch.
- Create and apply a template to a report.
- Create detail reports based on a single record.
- Create list reports based on multiple records.
- Create reports providing details of variable record content such as Stages and Actions.
- Create new reports based on existing reports.
- Create a Printed Report pertinent to your workplace.

Who this service is for:

- Designated Q-Pulse Administrators.
- IT Staff supporting Q-Pulse.

Entry requirements:

- Current competent Q -Pulse user with support contract.
- Using Q-Pulse version 5.2. or higher.
- Previously attended 'Report Designer Basic' course.
- Computer literate and familiar with form control design using text labels and fields.
- Good understanding of the Printed Reporting requirements of the organisation.
- An actual example of a Printed Report that requires to be created.

Course information
