

Creating an action plan for excellence in compliance

Purpose of the service:

- To offer a review service for a company that has recently implemented Q-Pulse and to identify areas where an impact can be made to identify improvement
- To enable the organisation to identify opportunities for improvement with the current compliance activities
- Ensure that a clear vision is in place for achieving excellence in compliance management
- Ensure that all actions contributing towards achieving excellence are fully defined and resourced accordingly

Benefits for your organisation:

- Your staff will have a clear vision of excellence in compliance and their role in its achievement

Benefits for you as an individual:

- You will have a clear vision of excellence in compliance and their role in its achievement

You will learn how to:

- Identify issues with your current compliance activities
- Identify barriers currently in place that are preventing excellence in compliance
- Define a model for achieving excellence in compliance.

Who this service is for:

- Those responsible for the strategic direction of compliance activities within your organisation.

Entry requirements:

- Existing user of Q-Pulse
- Fully familiar with all compliance activities within the organisation
- Current Q-Pulse support contract
